

ONLINE TRAINING

FOREST ADAPTATION

PLANNING

AND PRACTICES

The Northern Institute of Applied Climate Science and USDA Northern Forests Climate Hub are offering the [Forest Adaptation Planning and Practices](#) training as an online course for forest managers (7, 1.5 hour sessions).

This unique opportunity provides hands-on training in considering climate change information and identifying adaptation actions for natural resources management professionals whose focus is on maintaining and enhancing forests in the Central Hardwoods and Central Appalachians region. Participants will receive coaching and feedback on their own real-world climate adaptation project.

PARTICIPANTS WILL BE ABLE TO

- Identify locally-important climate change impacts, challenges, and opportunities
- Develop specific actions to adapt forests to changing conditions
- Use the [Adaptation Workbook](#) to create their own “climate-informed” projects
- Better communicate with stakeholders about key climate change impacts, challenges, and opportunities
- Access post-training support from NIACS staff during project planning and implementation

DETAILS

DATES

Seven 1.5-hour sessions

Weekly January 8 – February 19, 2019

GEOGRAPHIC FOCUS

Information will focus on forest planning and management in the Central Hardwoods and Central Appalachian regions, but applicants from other regions may be accepted if space allows.

REGISTER ONLINE

forestadaptation.org/2019onlineWorkshop

There is no registration fee thanks to support from the US Forest Service and USDA Northern Forests Climate Hub.

CONTINUING EDUCATION CREDITS

This course has been approved for 21 category 1 CFE credits by the Society of American Foresters.

QUESTIONS?

Northern Forests Climate Hub
U.S. DEPARTMENT OF AGRICULTURE

WHO SHOULD PARTICIPATE?

This training is designed for natural resources professionals working in forests and associated ecosystems in The Central Hardwoods and Central Appalachian regions. This includes foresters, natural resource managers, and consultants working on public, tribal, and private lands. Professionals providing Extension, service forestry, or technical assistance to foresters and woodland owners are also encouraged to participate. Individuals as well as small teams can participate in the course.

We ask participants to bring their own real-world projects.

Example projects could include:

- a forest management or stewardship plan for a property or parcel
- a timber sale or harvest plan for a single stand or multiple stands
- a habitat management plan for a wildlife species

Examples of Adaptation Demonstration projects that have used the Adaptation Workbook are online at www.forestadaptation.org/demos.

HOW DOES THE ONLINE COURSE WORK?

The seven-week online course draws on a combination of regular webinars and discussions with all participants, as well as independent work time to create adaptation projects. Throughout the course, participants will develop (individually or in small groups) their own climate-informed adaptation project.

- **Seven 1.5-hour web meetings** bring together all course participants to present and discuss key concepts, as well as share insights and questions related to individual projects. We expect participants to attend all sessions, but meetings will be recorded for those who may need to miss a session. **The meeting time will be Tuesday mornings. Exact time will be determined based on participant responses.** This course has been approved for 21 category 1 CFE credits by the Society of American Foresters.
- **Assignments** will guide participants through the new material, actively engaging them with recorded presentations, the online [Adaptation Workbook](http://forestadaptation.org), and other activities. Participants will be assigned work to complete before each session, which is generally expected to take 2-4 hours to complete.

Interested? Please register online by December 7, 2018

COURSE OUTLINE

Registered participants will receive instructions regarding how to prepare for the training in advance of the first meeting session. Prior to the training, participants will be asked to begin identifying a project to be used during the training and provide some additional information to course instructors.

Session 1 (January 8) — Defining Project Goals and Objectives

- Course objectives, instructors, and agenda
- Introduction to the Adaptation Workbook tool (tutorial)
- Developing an adaptation project
- Learning from Adaptation Demonstration projects
- *Assignment 1: Define project goals and objectives (complete in preparation for Session 1)*

Session 2 (January 15) — Understanding and Evaluating Climate Change Vulnerabilities

- Defining project scope and management goals/objectives
- *Assignment 2: Assess climate impacts and vulnerabilities.*

Session 3 (January 22) — Evaluating Management Challenges and Opportunities

- Climate projections and impacts on tree species, ecosystems, and regions
- Prioritizing vulnerabilities of greatest concern for management goals/objectives
- *Assignment 3: Evaluate objectives considering climate impacts.*

Session 4 (January 29) — Identifying Adaptation Strategies, Approaches and Tactics

- Re-considering and revising management goals/objectives in light of climate challenges
- Practice articulating climate-adaptive management goals/objectives
- *Assignment 4: Identify adaptation approaches and tactics.*

Session 5 (February 5) — Monitoring and Evaluating Effectiveness

- Meeting existing demands while preparing for future conditions
- Developing specific and actionable management plans for climate-change adaptation
- *Assignment 5: Monitor effectiveness of implemented actions.*

Session 6 (February 12) — Telling your Adaptation Story, Part 1

- Tools for measuring effectiveness of implemented adaptation actions
- Capitalizing on existing data, inventory or monitoring processes/partnerships
- *Assignment 6: Complete adaptation project plans.*

Session 7 (February 19) — Telling your Adaptation Story, Part 2

- Summarizing and pitching adaptation plans to partners, clients, and others
- Next steps for implementation

This course has been approved for 21 category 1 CFE credits by the Society of American Foresters.

INSTRUCTOR

This training will be led by a team of experienced instructors specializing in climate adaptation:

[Leslie Brandt](#), Northern Institute of Applied Climate Science & US Forest Service

Leslie serves as coordinator for the Urban Forestry Climate Change Response Framework, and lead author of the Chicago Wilderness region urban forest vulnerability assessment and synthesis, which served as a pilot for vulnerability assessment of urban trees and forests. She has led trainings for the general public and urban forestry professionals on climate change impacts and adaptation in the Chicago, Cleveland, Boston, Philadelphia, and Twin Cities regions.

[Patricia Leopold](#), Northern Institute of Applied Climate Science & Michigan Technological University

Patricia Leopold is the coordinator for the Climate Change Response Framework in the Central Appalachians (OH, WV, MD) and the Mid-Atlantic (PA, NY, NJ, DE, MD). Patricia has been working to develop climate change tools and resources with NIACS since 2009.

REGISTER!

There is no registration fee thanks to support from the US Forest Service and the USDA Northern Forests Climate Hub.
