## Climate Adaptation for Land Trusts

November 2<sup>nd</sup>, 5<sup>th</sup>, and 19<sup>th</sup> 2020

### Online Short Course

#### Is this training for me?

This online short course is designed for land trusts actively working on stewardship projects in rural, suburban, and urban forests, forested watersheds, and wetland systems.

Land trusts can participate as individuals or in groups up to five. Climate vulnerability information will be targeted to ecosystems in the U.S. Midwest, Northeast, Intermountain west and Pacific Northwest.

#### Virtual Class Schedule:

November 2<sup>nd</sup>, 5<sup>th</sup>, and 19<sup>th</sup>, 2020 at  
11 a.m. Pacific/12 p.m. Mountain/1 p.m. Central  
/2 p.m. Eastern

**Cost:** \$125.00 per land trust (limit of 5 staff)

Climate Science

This course will be held over 3 weeks requiring 3 hours of virtual live classes, a self guided field session and assignments. Instructors will provide guidance, weekly check-ins, and coaching.

#### Course Goals

- Identify locally important climate change impacts, challenges, and opportunities.
- Understand a step-by-step process for considering climate change and carbon in land stewardship and management.
- Develop actions to help a specific natural area adapt to changing conditions.
- Communicate with stakeholders about climate impacts and adaptation responses.

#### Self guided field session:

Participants are asked to visit a property or natural area of their choosing and think about real-world applications of the course material.
